Our Company has a specialization in their respective field, viz, Sanitary Installation, Hot water and Cold water supply, Space Heating, both G.I. and copper, composite, C.P.V.C, s/s pipe, H.D.P.E.,

U.P.V.C. pipe etc. sewerage, Storm water drainage, Fire Fighting System and sprinklers, Water Filtration plants. Softening Plants, Hydro pneumatic automatic pumping system, Garden and fountains pumping and piping and its connected Interior, Civil work. We Endeavour to stay ahead in order to better serve our customers.

## OUR SERVICES

### PLUMBING SERVICES

Sometimes our washbasin or kitchen sink trouble. In this situation, people are facing lots of problems. In this situation, we need skilled Plumbing and Sanitary Works Contractors who have solved our problems at a given time. Like that plumbing problem, we are facing more difficulties with drain blockage, drain overflow. These types all problems we need the best plumber that provides us valuable price services.

We know drain is the one leading way to water input. Hence always clean drain is the first priority for us. But sometimes drain was block this situation people's faces lots of difficulties. Resolving like that situation we need to plumber services which provide you better service at a given time.

### WATER TREATMENT PLANT

We know how water best part of our life. Because if water does not in the earth then lots of animal and peoples are finished. Our earth has lots of water but day by day the water level is down. Hence if we are alive then we have needed lots of Water Treatment Plants. Hence most of the engineering team decided to save rainwater and build a water treatment plant that filters rainwater and makes drinking water.

Hence in this modern era, lots of countries install their Land water treatment plant. Because water treatment plants help the government to provide safe drinking water from filter rainy waters. By the way, in this modern era, lots of engineers make small water treatment plants for covering small areas like -village, and small population areas.

### SEWARAGE TREATMENT PLANT

Onsite (or decentralized) wastewater treatment systems are used to treat wastewater from a home or business and return treated wastewater back into the receiving environment. They are typically referred to as septic systems because most involve a septic tank for partial treatment. We need to Sewage Treatment Plants.

The most common and traditional septic systems consist of a septic tank that gravity flows to a soil adsorption field for final treatment and dispersal. The septic tank allows particulate matter to settle to the bottom of the tank so that large solids do not plug the drain field.

An effluent screen placed in the outlet of the septic tank is used to filter suspended solids out of the effluent. Final treatment and dispersal of the wastewater take place in the soil adsorption field.

## OUR SERVICES

### EXTERNAL SERVICES

We know Pipe is the necessary item for our residential and commercial homes and shops. If you are planning to build your homes then you need a plumber because before whitewash in the home needs water distribution pipes that distribute water from in the house many locations such as kitchen, bathroom, room, garden, etc. hence Pipe Installation Work Contractors finish before whitewash. Lots of residential and Commercial Constructed building needs plumber that installs pipe in the full buildings. Isometric drawings include equal drawings with precise dimensions represented, line numbers, pipe insertion, valves, flanges, special parts, tables including a list of all items included in the drawings, etc.

### FIRE FIGHTING SYSTEM

We know fire which is a danger for our health and our homes. Sometimes you see in the news channel's some location has damage for cause is fire. Hence always be alert if you are in homes and commercial spaces. Some people if construct their house and commercial shop but they can't protect their house from fire accident cover. If you are planning to build your residential homes and commercial spaces shop always take advice from Fire Fighting Works contractors.

### FIRE ALARM SYSTEM

A fire alarm system is a system that includes signaling-alarm devices that automatically detect and communicate fire information. Fire alarm systems are designed to work in a variety of environments. They should be physically fit during the operation.

### GARDEN IRRIGATION SYSTEM

Garden watering systems work by carrying water around the garden in a series of irrigation supply pipes connected to a water source (usually a standard outside tap). When you have the irrigation supply pipe running past all of the plants you wish to water, you then connect water outlets to the pipe matrix to regulate the release of water.

# OUR SERVICES

## CIVIL CONSTRUCTION SERVICES

Civil engineering is a branch of engineering that deals with the design, construction, and maintenance of infrastructure and projects that enhance the well-being and quality of life for society. It encompasses a wide range of activities and includes various sub-disciplines. Here are some key aspects of civil engineering:

**Structural Engineering:** Structural engineers design and analyze the structural components of buildings, bridges, dams, and other structures to ensure they can withstand loads and environmental conditions.

**Geotechnical Engineering:** Geotechnical engineers study the properties of soil and rock to determine their suitability for construction projects. They also design foundations and earth-retaining structures.

**Environmental Engineering:** Environmental engineers focus on designing solutions to environmental problems, such as water and air pollution control, waste management, and sustainable infrastructure.

**Water Resources Engineering:** Water resources engineers work on projects related to the management, distribution, and conservation of water resources, including water supply, flood control, and wastewater treatment.

**Construction Engineering:** Construction engineers are involved in the planning and execution of construction projects. They manage resources, budgets, and schedules to ensure projects are completed successfully.
